DETAILED ACTION

Status of the Claims

In response to the applicant's amendments received 10/31/06, claims 1-29, 35-75, 77, 80, 81, 88, 90-93, 95-99, 108 and 131 have been cancelled and an examination of pending claims 30-34, 76, 78, 79, 82-87, 89, 94, 100-107, 109-130 and 132-145 follows.

Drawings

The drawings are objected to because they fail to clearly identify the "*triangular spaces defined between adjacent flanges*". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no support in the specification for the triangular shaped spaces defined between adjacent flanges.

Allowable Subject Matter

The claims appear to be allowable; however, allowance is held in abeyance until receipt of drawing in conformance with 37 CFR 1.121(d) and amendments to the specification in conformance with 37 CFR 1.75(d)(1).
